

# WHY YOU SHOULD GET THE COVID-19 VACCINE

## Made for Latino Families by Your Community Leaders

### FORMER CALIFORNIA STATE SENATOR

- We Latinos are dying the most from COVID-19.
- The Latino community is suffering from very low vaccination rates, and our community is dying in very high numbers from COVID-19.
- Let's protect our community, so our culture lives well into the future.
- It's better to have a sore arm than to be in the hospital.
- It's time to believe in science, and the science says the vaccine works!
- So PLEASE vaccinate yourselves and your loved ones!

### CEDERS SINAI DOCTOR - ENDOCRINOLOGY

- It will keep you, your family, and your community safe.
- The vaccines approved in the US have been given to millions globally and are safe and effective.
- The vaccine cannot cause COVID-19, and it does not interact with your DNA and genetics, nor does it contain tracking chips.
- It is free, and your information is 100% confidential.
- Vaccines save lives and the sooner we all get vaccinated, the sooner we will control the virus.

### CENTRO DE NINOS EXECUTIVE DIRECTOR

- Of all the COVID-19 deaths in Los Angeles County
  - 46 percent were Latino (~ 1 in 2 people)
- If we did get infected after being vaccinated, the infection would be mild, and you would not need to be hospitalized, nor would you die.
- Please get the COVID-19 Vaccine as the side effects are much better than if you were to get infected.
- We are all in this together.

### UCLA DOCTOR - PEDIATRICS

- The amazing benefits outweigh the risk.
- This vaccine followed previous protocols in development and safety
- Unfortunately, what we hear or read on the news, Facebook or other sources is often incomplete information or false information.
- This vaccine has cleared a clinical trial phase, making it extremely unlikely this vaccine has any long-term adverse effects.
- Please make sure to get your information from trusted sources.
- Please talk to your doctor or other health professionals you trust.

**Pfizer = 2 Doses (3 weeks Apart)**

**Moderna = 2 Doses (4 weeks Apart)**

**Johnson & Johnson = 1 Dose Only**
